-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 08 July 2003.

2a) This action is **FINAL**. 2b) This action is non-final.

3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Objections

2. Claims 1-6 are objected to because of the following informalities: Claim 1, line 9: "and" should be deleted. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-2 and 8 are rejected under 35 U.S.C. 102(e) as being anticipated by Alappat et al. (6629181).

Alappat (Figures 1-5) shows an information handling system having a printed circuit board 66, 112 having a plurality of information processing components 72,114 disposed on the circuit board, at least one component distal (separate) from the circuit with a cable 122 with a cable signal connector at the ends engaging board signal connectors (such as connector 68 on board 66) and a protective housing (not numbered) with connectors 52, 58, 62 wherein the housing allows coupling of the cable

and board connectors 62, 68 as well as has walls to absorb force applied to the signal connectors. The board 66 has two connectors integral with each other. The printed circuit board 66 is coupled to the housing by a slot. Figure 3 shows a mating connector at the end of cable 22 mating at right angles to the board 112.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3-7 and 9-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alappat (6629181).

Alappat shows all the features of these claims as described above except the board signal connector to be a Serial ATA connector connected to the board by soldering or board locks and the printed circuit board accommodated in parallel slots. These features are well known in the art of electrical connectors. It would have been obvious to one having ordinary skill in the art at the time of the instant invention to provide these features because this would provide a well known and standard connector permanently or detachably connected to the circuit board and parallel slots would require a mere duplication involving only routine skill in the art.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kwang (6098127) and Medina et al. (6296514).
